EXPLANATORY NOTES

Market Value and Volume of Sales on Registered and Exempted Securities Exchanges

The data presented in this table are of two types depending upon the method of aggregation used by each exchange. Reports of those exchanges marked with an asterisk cover transactions cleared during the calendar month; clearances occur for the most part within five days of the execution of a trade. Reports for other exchanges cover transactions effected on trade dates falling within the report month. The variance introduced by these two different methods of aggregating the data is not considered to be significant and accordingly all registered exchanges are aggregated and reported in monthly summaries.

Stock data include voting trust certificates, certificates of deposit for stocks and American Depository Receipts for stocks.

Bond data have excluded transactions covering United States Government issues since March 1944.

Warrants data include trading in rights for all periods prior to January, 1972.

NOTE: SEE EXPLANATORY NOTES FOR OFFERINGS TABLES.

EXPLANATORY NOTES FOR OFFERINGS TABLES

1971 TO PRESENT 1/

The data included in the Commission's statistical series on securities offerings are a sample of the universe of all securities offered in the United States. This sample includes all primary security issues registered with the Commission for immediate cash sale to the public pursuant to the requirements of the Securities Act of 1933 or Regulation A of that Act. The sample also includes information collected by the Commission on certain private placements as described below. Excluded from the offerings data are all offerings not greater than \$100,000; all debt securities with terms of less than one year; all secondary offerings; all non-cash offerings; issues withdrawn after effective registration; issues not defined as securities under Section 2(1) of the Securities Act of 1933; offerings--both public and private--by issuers whose securities are exempted under Sections 3(a)(2)-3(a)(6) and Section 3(a)(11) of the Securities Act of 1933 2/; all employee stock plans; investment company issues other than closed-end shares 3/; intracorporate securities transactions; and sales to foreign purchasers.

The source of data for registered offerings is the registration statement filed with the Commission by the issuer of the securities. (Registration data and offering data are not directly comparable because, beyond the exclusions noted above, the registration date and the offering date may fall in two different monthly or yearly periods.) Data on private placements are collected by a Commission survey of 39 life insurance companies on a monthly basis and 9 more on a quarterly or semi-annual basis, and by reports of private placements filed on the Commission's Form 8-K. Life insurance companies surveyed by the Commission had assets on December 31, 1972, of \$190,145 million, or 79% of all life insurance company assets. Only those private placement commitments which are actually executed are included in the statistics. No representation is made that the private placement activity of the life insurance companies surveyed approximates private placement activity as a whole in the United States.

The offerings tables make a distinction between Corporate Offerings and Foreign Government Offerings. It should be noted that Corporate Offerings include issues by non-corporate business enterprises such as limited partnerships, and that the Foreign Government classification includes foreign government issues of all levels, foreign government agencies, and foreign government-owned enterprises.

The industry classification used in the offerings tables should be self-explanatory for the most part. It should be emphasized that the Communication group includes telephone utilities. In the period 1971-73, 98% of the dollar value of the registered issues in this category was accounted for by telephone utilities. The Commerical and Other industry group is comprised of agriculture, contruction, wholesale and retail trade, and all service activities other than financial services.

The security types used in the offerings tables are Bonds, Preferred Stock and Common Stock. The Bonds group includes convertible bonds, which are detailed on a special table. The Preferred Stock group includes convertible preferred stock; however, in the period 1971-73 registered convertible preferred stock accounted for less than 15% of the value of all registered preferred stock. The Common Stock category includes common shares issued by closed-end investment companies (preferred shares are included in Preferred Stock), as well as securities issued by non-corporate business such as certificates of participation and shares of beneficial interest, and other equity securities such as voting trust certifcates and certificates of deposit. American Depository Receipts are not included in the offerings statistics.

All figures are subject to revisions as new information becomes available which requires either an addition to or a correction to data previously published. Revised figures will be indicated with an "R".

-
- 1/ Explanatory notes applicable to the offerings data prior to 1971 may be found in Volume 33, pages 45 and 46, of the Statistical Bulletin. The major difference between the pre- and post-1971 data is that until 1971 the securities cited in footnote 2 were included in the offerings statistics.
 - 2/ 3(a)(2) exempts domestic government issues and bank issues, 3(a)(3) exempts securities arising out of current transactions with a maturity not exceeding 9 months, 3(a)(4) exempts securities issued by non-profit and/or charitable groups, 3(a)(5) exempts issues by savings and loan associations, 3(a)(6) exempts issues by companies regulated by the ICC, and 3(a)(11) exempts intrastate offerings.
 - 3/ No investment company shares are included for 1971 and 1972; closed-end investment company shares only are included for 1973. The Commission plans to revise the offerings data to include closed-end shares for the years 1971 and 1972, and when this project is completed, revised tables will be published in the Statistical Bulletin.

^{*} Dividend reinvestment plans tabulated beginning January 1973.^{1/} Closed-end investment companies were included in extended cash sale until December 1972.

Closed-end shares include preferred and common stock.

^{2/} Includes mergers and consolidations subject to registration under 1933 Act, Rule 154, effective January 1973.

Note: See Explanatory Notes for Registrations

EXPLANATORY NOTES

Registrations

Data cover all registrations which became effective under the Securities Act of 1933 during the period covered. Issues are included as of the effective date, with the exception of those subject to post-effective amendment to report terms of offering. These are included as of the date of the post-effective amendment.

The classification primary corporate offerings refer to registered offerings for immediate cash sale where the proceeds of the offering are at the disposal of the issuing corporations. Secondary offerings are registrations of outstanding securities where the proceeds of the issue do not accrue to the issuing company. The dollar amount for both type offerings is based generally on the initial offering price. The classification unseasoned common stock includes initial offerings by companies registering common stock for the first time under the Securities Act of 1933, whereas seasoned common stock offerings are registrations by companies previously having securities registered under the 1933 Act. Other equity securities classification consists of offerings of certificates of participation or beneficial interests, warrants or options, voting trust certificates and other equity securities.

Issues to be offered for extended cash sale include investment company issues, and all offerings of employee savings and stock option plans. The classification foreign government is shown separately, whereas registrations by foreign corporations are included in with corporate offerings. Investment company securities include open-end, face-amount and unit trust offerings. Closed-end securities are included in primary corporate offerings.

Issues registered for other noncash purposes such as exchange transactions, securities given for property or services, or reserved for conversion are generally valued at the current market prices.

In order to eliminate double counting, the number of issues are shown for primary and secondary offerings only. However, effective registrations cover all cash offerings, noncash offerings, and offerings for extended cash sale.

Dollar amounts have been rounded and will not add to totals.

FOREIGN SECURITY ISSUES SOLD IN THE UNITED STATES

The accompanying tables detail certain securities transactions in the American capital market by foreigners. Included are all issues registered with the Securities and Exchange Commission for sale to the American public, and also issues placed privately with a sample of American life insurance companies who voluntarily report their private placements to the Commission. In private placements, only the portion of the issue which is actually reported as taken down is included in the figures. American Depository Receipts are not included, nor are secondary offerings. Issues by enterprises which are either wholly or partially state-owned but which operate in the transportation industry are entered on the tables as corporate securities and are noted with an asterisk (*).

The two-letter code used to identify the country of origin of each security was developed for the National Bureau of Standards by the Department of State. A summary of these codes is included with the tables; more detailed information can be found in "Federal Information Processing Standards Publication 10", available from the Superintendent of Documents, Washington, D.C.

Country of Origin Codes

<u>Code</u>	<u>Country</u>

— sec publications —

Companies registered with the Securities and Exchange Commission under the various Acts are sent copies of individual releases pertaining to rule proposals and rule changes under the Acts for which they are registered. Complete texts of all releases, as well as reports on other aspects of Commission business, are available through a series of publications designed to keep interested firms and members of the public informed about the work of the Commission. The following publications can be ordered from the Superintendent of Documents using the coupon below.

NEWS DIGEST A daily report of Commission announcements, decisions, orders, rules and rule proposals, current reports and applications filed, and litigation developments. (\$64.45 per year)

SEC DOCKET A weekly compilation of the full texts of SEC releases under the following Acts: Securities Act, Securities Exchange Act, Public Utility Holding Company Act, Trust Indenture Act, Investment Advisers Act, and Investment Company Act. Also included will be the full texts of Accounting series releases, corporate reorganization releases, and litigation releases. (\$43.70 per year)

STATISTICAL BULLETIN A monthly publication containing data on round-lot and odd-lot share volume in stock exchanges, OTC volume in selected securities, block distributions, securities registrations and offerings, net change in corporate securities outstanding, working capital of U.S. corporations, assets of non-insured pension funds, 144 filings and 8K reports. (\$28.40 per year)

OFFICIAL SUMMARY A monthly summary of securities transactions and holdings of officers, directors, and principal stock holders. (\$61.05 per year)
